

SNOW BUCKET

Optimal® snow clearing bucket is perfect and effective tool for large areas to increase the capacity and to reduce the number of working hours.

The bucket is conically shaped with rounded back edge which makes the snow more easily to fall out from bucket during the emptying.

The spring-loaded scraper steels on wings and on the bucket bottom are reversible which gives a long life for these spare parts. Also the spring-loaded scraper better follows the surface of the ground.

Optimal® snow bucket is equipped with diagonal valve to operate left or right wing separately.

Technical specifications

Mudel	WB-1500	WB-2500	WB-3500	WB-4000
Volume	1,5 m ³	2,5 m ³	3,5 m ³	4,0 m ³
